Hi Rafael,

I can get this singed right away. As per my previous requests, please provide a cost estimate to me regarding disposal work. I need line items for the following:

- Hydraulic fluid (1 drum);
- Soil in debris (8 drums);
- Soil and debris in 20 cy bin.

Also, as per a discussion that I had with Michael yesterday afternoon, it was my understanding that Clean Harbors also wanted to provide a cost on the removal of the liquid and decontamination of the Baker Tank. We are committed to doing this work on Thursday. If Clean Harbors can do the work on Thursday, I have no problem with getting a bid for this work, but you will need to get it to me this morning.

Thanks.

Brett Bowyer, P.G.

Hello Brett,

Attached is a used oil certification that is needed for the disposal of the single drum of recovered oil.
Can you please complete and return

Thanks,

Rafael,

Can you please provide feedback on the off-site disposal of the liquid and solid waste material. By-the-way, I did ask the lab to go forward with the TCPL testing for benzene of the drummed and 20 cy soil bin waste. I asked for a three day turnaround, so we should have those results back by next Tuesday. I think there is a good possibility that the solids will not fail the TCLP for benzene, so we may be able to avoid the LDR restrictions.

We want to move forward with the liquid waste removal as soon as possible and are waiting on you.

Thanks.

Brett Bowyer, P.G.
